Not Specified

01 ABOUT THE ROLE

We are seeking a commercially driven and detail-oriented Purchase Manager for procurement activities across packaging materials and related operational requirements.

This is an individual contributor role requiring **strong negotiation capability**, vendor management expertise, and disciplined follow-through. The role will be responsible for sourcing and managing procurement of bottles, labels, caps, cartons, packaging materials, spare parts, and machinery as required.

The ideal candidate should bring strong cost control discipline, supply chain awareness, and the ability to operate independently in a fast-paced environment.

02 KEY RESPONSIBILITIES

Key Responsibilities

Strategic Sourcing & Vendor Management

Lead sourcing and procurement activities for packaging materials including bottles, labels, caps, cartons, corrugated boxes, etc.

Identify, evaluate, negotiate, and onboard reliable vendors aligned with quality, cost, and delivery expectations

Develop and maintain strong long-term supplier relationships to ensure supply continuity and commercial advantage

Conduct periodic vendor performance reviews covering pricing, quality, responsiveness, and service levels

Continuously evaluate alternate sourcing opportunities to improve competitiveness and reduce dependency risks

Commercial Negotiation & Cost Control

Lead commercial **negotiations with suppliers to secure the best pricing**, payment terms, delivery schedules, and contractual conditions

Perform detailed cost comparisons, market benchmarking, and price analysis across suppliers to identify cost-saving opportunities

Drive procurement strategies focused on cost reduction, value engineering, and margin improvement

Analyze material cost structures and negotiate effectively using data-driven insights

Monitor raw material price movements, market trends, and industry benchmarks to minimize commercial risk exposure

Ensure all procurement decisions are commercially optimized without compromising quality or service standards

Build robust RFQ/RFP comparison models and supplier evaluation frameworks for informed decision-making

Procurement Planning & Execution

Align procurement with production schedules and inventory levels

Ensure timely availability of packaging materials

Monitor purchase orders from issuance to delivery

Coordinate with internal teams to prevent stock-outs or overstocking

Spare Parts & Machinery Procurement

Source spare parts and equipment components as required

Coordinate machinery procurement in alignment with operational needs

Ensure technical specifications are accurately aligned with vendor supply

Compliance & Documentation

Ensure procurement documentation is accurate and complete

Maintain contract records and supplier agreements

Ensure compliance with internal controls and audit standards

Risk Management & Supply Continuity

Develop alternate vendor strategies
Mitigate supply disruptions
Monitor vendor financial stability and operational capability

03

KEY SKILLS & COMPETENCIES

Key Skills & Competencies

Commercial & Negotiation Skills

Must be competent: Tally ERP - 9

Strong vendor negotiation capability
Understanding of pricing structures and cost breakdowns
Ability to drive cost optimisation without compromising quality

Procurement & Supply Chain Knowledge

Strong understanding of packaging materials and FMCG operations
Familiarity with inventory planning and procurement cycles
Knowledge of spare parts and machinery sourcing processes

Operational Discipline

Strong follow-up and execution capability
Ability to manage multiple vendors and timelines simultaneously
Structured and detail-oriented approach

Professional Attributes

High ownership mindset
Strong communication skills
Professional presentation and grooming standards
Ability to work independently and take decisions responsibly

What Success Looks Like in this Role

Achievement of **measurable cost savings through strong supplier negotiations** and strategic sourcing initiatives

Consistent delivery of commercially competitive pricing through effective cost comparison and market benchmarking

Zero or minimal production disruptions due to material shortages

Strong supplier partnerships with improved quality, service, and delivery performance

Effective inventory control with reduced excess stock and minimized stock-out risks

Timely execution and closure of procurement activities with high operational efficiency

Improved procurement transparency, documentation accuracy, and compliance adherence

Contribution to overall supply chain efficiency, cost control, and business profitability within the environment

05 QUALIFICATION

Bachelor's degree in Commerce, Engineering, Supply Chain, or related field

Minimum 5 years of experience in procurement within FMCG, packaging, or manufacturing industries

Proven experience handling packaging materials sourcing
